## The increasing age of marriage among young people is a problem

Dr. Anita Sambhaji Pisal/ Mohite  
Assistant Professor,  
Bharati Vidyapeeth (Deemed to be University)  
Social Science centre, Pune.

### Abstract

The age of marriage seems to be a problem for young people in the patriarchal society of the twenty-first century. Traditionally the expectation of marriage for marriage is increasing but now when marriage is taking place the parents of the children have raised their financial status, social prestige and expectation that the son should be a high official. In the past, people used to look at the nature of the child's mother and father and the humanity in him while giving birth to a daughter, but now the situation has changed. In today's situation parents look at the property of the child's father. He expects the boy to be a high official, but what about the people in the house where the girl is going to be married? This is not considered.

### Introduction

Marriage is a test and a joyous experience in life. Marriage is a test of marriage, but it is a joy to make it happen. It is possible to pass the test carefully and cunningly, but if one does not pass the test, one has to repent for the rest of one's life and if one does not get married peacefully, one loses happiness for the rest. Lost happiness can only be regained when life is in harmony.

Matching marriages take a test on both sides. Success can only be achieved when the right bride and groom are chosen, otherwise the fever of remorse suffers and leads to divorce.

In the past, marriage was arranged at a very young age. The father played an important role in this. What they said and did was taken into account. Children do not even get to see and talk to each other before marriage. In a wedding ceremony one does not need to talk and meet, but only to see it and be satisfied or dissatisfied. But he had to take it. He had no other choice. This birth is built in heaven. Assuming that, Minute had to accept.

Now, however, the situation has changed completely. Not only with age but later marriages match and happen. It does not reflect the will of the elders. Young people have full understanding and are determined to do as they please. Previous restrictions on the spouse's caste, religion, creed, province, country, etc. are no longer necessary. Now it's time to dump her and move on.

Everyone and everyone has their own expectations about your partner. It's not that they're holding on to reality. It doesn't matter who I am or who I am, but my spouse is expected to be the best, the best, the incomparable. Some people have no idea how much space they have to find and how many shoes to wear to meet this expectation and it is their turn to age

and stabilize. When you don't have that much qualification, you have to tell this unrealistic expectation to the groom,

Education is the main reason why it is said that child marriage is a hindrance. All parents thought that their children should be educated and stand on their own feet. Parents say, but you don't make it happen. In contrast, there are cases where the child feels that he should get an education now that he should get a job. This shows that children are paying more attention to their careers. It doesn't matter if the marriage is a problem or not.

It is a good thing that education changes the mindset of boys / girls. Attitudes change as we look at the world. The higher the level of thought and its consequences, the more we will ignore the big issues in life like marriage. Constant comparisons are made with each other and the subject of marriage goes for the benefit. It is a pity that children do not realize that this is hurting their parents.

Industrialization has had a major impact on young marriages. He said that good jobs are available for boys and girls. Salary as expected, all facilities are available, but not all of them affect personal life. All of this puts you first when it comes time to raise youth expectations.

Modernization has improved the lifestyle of young people, changed the way they think, changed the way they look at others, and enhanced their capacity. Don't hesitate to say that all this is unknowingly affecting your personal life. That means something like marriage is being delayed.

Globalization has improved the lifestyles of young people, changed the way they think, changed the way they look at others, and increased their abilities and expectations. Attitudes towards marriage changed. Young people began to make decisions on their own, and marriage began to feel like a bond. Marriage seems to be a responsibility, so I love living in a live-in and you can see how it affects your personal life.

Young people began to make their own decisions. Being young and highly educated, it can meet its own needs. He does not depend on anyone because he is lacking. He lives his life his way but she forgets that he has forgotten his parents. He forgets his family in the surrounding environment. He finds himself so engrossed in the Western way of life that he seems to have forgotten the same rites of his parents.

Young people are highly educated and have a well-paying job, but in doing so they try to improve their financial situation. Ignoring their marriage raises the expectations of the spouse, they should be beautiful and the recipient should also give time to their family. Even though her own marriage age has passed, there are unrealistic expectations from her and her parents are responsible for all this. Like children, parents have high expectations. Marriage is said to be responsible for the growing age of young people. That is why delaying the marriage of a young man is as follows.

#### **Reasons for late marriage**

- **Education**
- Teaching
- Changed thoughts
- Modernization
- Industrialization
- Globalization
- Independently
- Living Lifestyle
- The effect of the environment
- Friends with friends and girlfriends
- Financial status

- Parents neglect
- Youth Growing expectations of youth
- Beautiful look
- Carrier
- Jobs
- Job Expectations of government jobs
- Raising the expectations of parents
- Time spent in Public Service Commission examinations

Unrealistic expectations from parents' children Expect their son / daughter to become a government official. He doesn't even have time to see what his roots are in the city. Paying means that even a parent who understands everything is responsible for it.

But it is difficult to find a young man with all these qualities. So you should also tell her, if you don't want to stumble, then go to your mind and go with someone who doesn't have a lot of bad qualities.

When choosing a spouse, color, appearance, age, education, duties, family lineage, temperament, quality, retirement, etc. should be taken into consideration and balanced. You have to consider your own color, appearance, age, education, duties, family lineage, temperament, quality, retirement, etc., and find your qualifications. The same combination is successful and enjoyable. So the problems that arise in this case have to be solved on the strength of reality, leaving only the unreal.

Marriage is a life of trials and tribulations. There is a test in matching marriage, but there is joy in making it happen. The test can be passed carefully and cunningly and if it is not passed then one has to repent for the rest of one's life and if the marriage is not consummated satisfactorily then one has to lose the happiness for the rest of one's life. Only when there is harmony can the lost happiness be regained.

Marriage is a test of both sides. Only when the right bride and groom are chosen can success be achieved.

#### **The previous situation**

In the past, marriages were arranged at an early age. The elders used to play a major role in it. What they said and did was taken seriously. Before marriage, children don't even get to see and talk to each other. Not only did they get to talk and meet each other during the wedding ceremony, but they got to see each other and get satisfaction or dissatisfaction. But he had to take it. He had no other choice. This birthmark is built in heaven. Assuming that, Nimut had to accept.

#### **The current situation**

In the present situation, marriage seems to be a problem. It is difficult to do this without explaining that the situation of your family, environment, education, job, relatives, appearance of the girl as well as the financial situation of the boy, unreasonable expectations of both the parties are delaying the marriage. Not coming The concept of marriage is changing.

Now, however, the situation seems to have changed radically. Not only with age, but even later marriages match and take place. It does not necessarily reflect the wishes of the elders. Young people are fully aware of this and are determined to make it their own. Restrictions on the spouse's caste, religion, creed, province, country, etc., which used to be observed, are no longer necessary. It's time to dump her and move on.

Regardless of the age, each person and each person's own expectations of their spouse increase. It would not be wrong to say that marriage is a boon because of career and education. No matter who I am or who I am, my spouse is expected to be the best, the best,

the incomparable. Some people do not know how many places to look for and how many pairs of shoes to wear for fulfilling that expectation. The bride and groom do not get the bride and groom who have these unrealistic expectations when they do not have that much qualification. Parental care increases. That is why I would say that marriage has become a problem.

### **The importance of marriage in modern times**

Marriage has been an important and sacred part of tradition in Indian society. Let it be said that marriage has been considered not only of one birth but also of seven births. Marriage is not a relationship of living with a young man and a young woman but it is also establishing a valuable relationship between two families. But in today's fast paced life, this relationship is becoming extremely weak. If you look at the statistics, the number of breakdowns is a little less than in the West. It can also be said that in today's modern times, the importance of marriage is decreasing day by day.

If this subject is discussed seriously then it is becoming a problem which will become a major cause of destruction of society and families in the time to come. What is happening today is that in this modern century, young men and women are not getting ready for marriage easily and most of what is happening is getting divorce cases in court soon. Where many things have changed today in the rapidly changing times, some forms of social prestige have also changed. For example, until some time ago, boys and girls used to get satisfied by marrying according to the wishes of their parents and settling down at home, but today it is rarely seen. Speaking of this changing era, with freedom, girls not only got their own wings, but also the sky to spread those wings. In such a situation, the statement of getting married and settling down has changed. Being socially established no longer means having children by getting married, but having a good job, business or economic prosperity.

If you look at the same issue in the case of boys, then most of the boys are also trying to avoid it and are giving priority to relationships like live in relationships. The increasing number of false and true lawsuits of dowry day by day, leaning more towards one side of the law and allowing the other side to suffer its dangerous losses is also a big reason for the decline of marriage. It is not that the institution of marriage has become hollow and the society needs to get rid of it. No, it is what is lacking; it needs to be improved today. Today when marriage is discussed with a young person, he expresses negative feelings, i.e. he will try to avoid it by calling this sacred institution a life of slavery.

There is a big difference between the marriages that took place 10 years ago and the marriages that took place in the last two to three years, for example, marriages that took place with the consent of parents and families for ten years, including hundreds of boys and girls, two families Thousands of families were involved, all in a way became witnesses to it. In such a case, whenever any problem arose in this relationship, the whole family and society would join in trying to save it. But love marriages or marriages made by being attracted to each other in some time are breaking up soon.

The fear of social prestige that always helped save a relationship is disappearing completely today. If we talk about the present time, if there is a boy or a girl in front, if he falls in love with someone, then he breaks the relationship on the slightest thing after getting married. See many such relationships in the last few days the reason for a girl's divorce was just that after marriage the boy slapped her in the face. The girl did not tolerate this and filed for divorce.

Another boy divorced his wife just because she used to chat with her friends on social media like Face book till late at night. That is, the perception of today's people has become like a narrow ideology, because what is love to them? What is marriage? And what is its holiness? It is still ignorant about them. This is the difference between the time before and

the time today that the people of the past used to consider marriage as a sacred relationship and walk together in every happiness-sorrow, ups and downs and take their relationship to a destination. But in today's marriage, if even a little bit interrupted each other or could not meet each other's needs, then this relationship does not last long, and it is time for divorce. That is why marriage has been made a joke by today's young generation, realization and relationship is now completely over.

#### Conclusion

The factors that contribute to the increasing age of marriage of a young man are education, job, good salary; Because of all the comforts in the city and the company of friends, the young man did not pay attention to his growing age. Similarly, parents should be concerned about their child's future, but that does not seem to be the case. The expectations of young people and parents about marriage are increasing day by day. This picture is getting you first. All of the above conditions are said to be factors contributing to the increasing age of young marriage.
